

PORTFOLIO PROJECT

Instagram Shop for my friend

Full development cycle — from idea to finished website

React

Tailwind CSS

JavaScript

Responsive Design

Dmytro Vilihotskyi · Full-Stack Developer

What Needed to Be Done

No Website

The shop existed only on Instagram — no dedicated storefront for sales.

Catalog Chaos

Products scattered across posts with no search, filters or clear pricing.

The Goal

Build a beautiful, responsive online store in the Instagram aesthetic style.

Project Stack

UI / Layout

React.js · JavaScript · Tailwind CSS · CSS

Components

Responsive grid · Cart · Filtering · Product cards

Tools

Git · Postman · VS Code

React

main framework

100%

responsive design

JS

no TypeScript

What's Built into the Site

Product Catalog

Filtering and product cards with prices. Responsive grid for any screen size.

Shopping Cart

Add items, change quantity, real-time total recalculation.

Mobile First

Fully responsive — from large desktop down to smartphone.

Tailwind CSS

Fast and consistent styling. Smooth transitions and micro-interactions.

React Components

Component architecture, cart state via React state — no extra dependencies.

Instagram Aesthetic

Minimalist design matching the client's Instagram shop style.

Full Cycle Control

→ **Analysis** Talked with the client, defined requirements: catalog, cart, responsive design.

→ **Design** Agreed on visual direction — minimalism aligned with Instagram aesthetics.

→ **Development** Frontend in React + Tailwind CSS. Component architecture, cart logic via React state.

→ **Layout** Responsive grid from desktop to mobile. Smooth animations and micro-interactions.

→ **Handoff** Delivered the finished code, explained the structure — the client can update content independently.

What the Client Got

React

modern stack

Mobile

smartphone-optimised

Own

independent online store

- ✓ Product catalog with filters and cards
- ✓ Shopping cart with real-time total calculation
- ✓ Fully responsive design for mobile
- ✓ Tailwind CSS styling — clean and consistent
